# **Underchallenged when not at test: Boredom in laboratory mice**

Lars Lewejohann

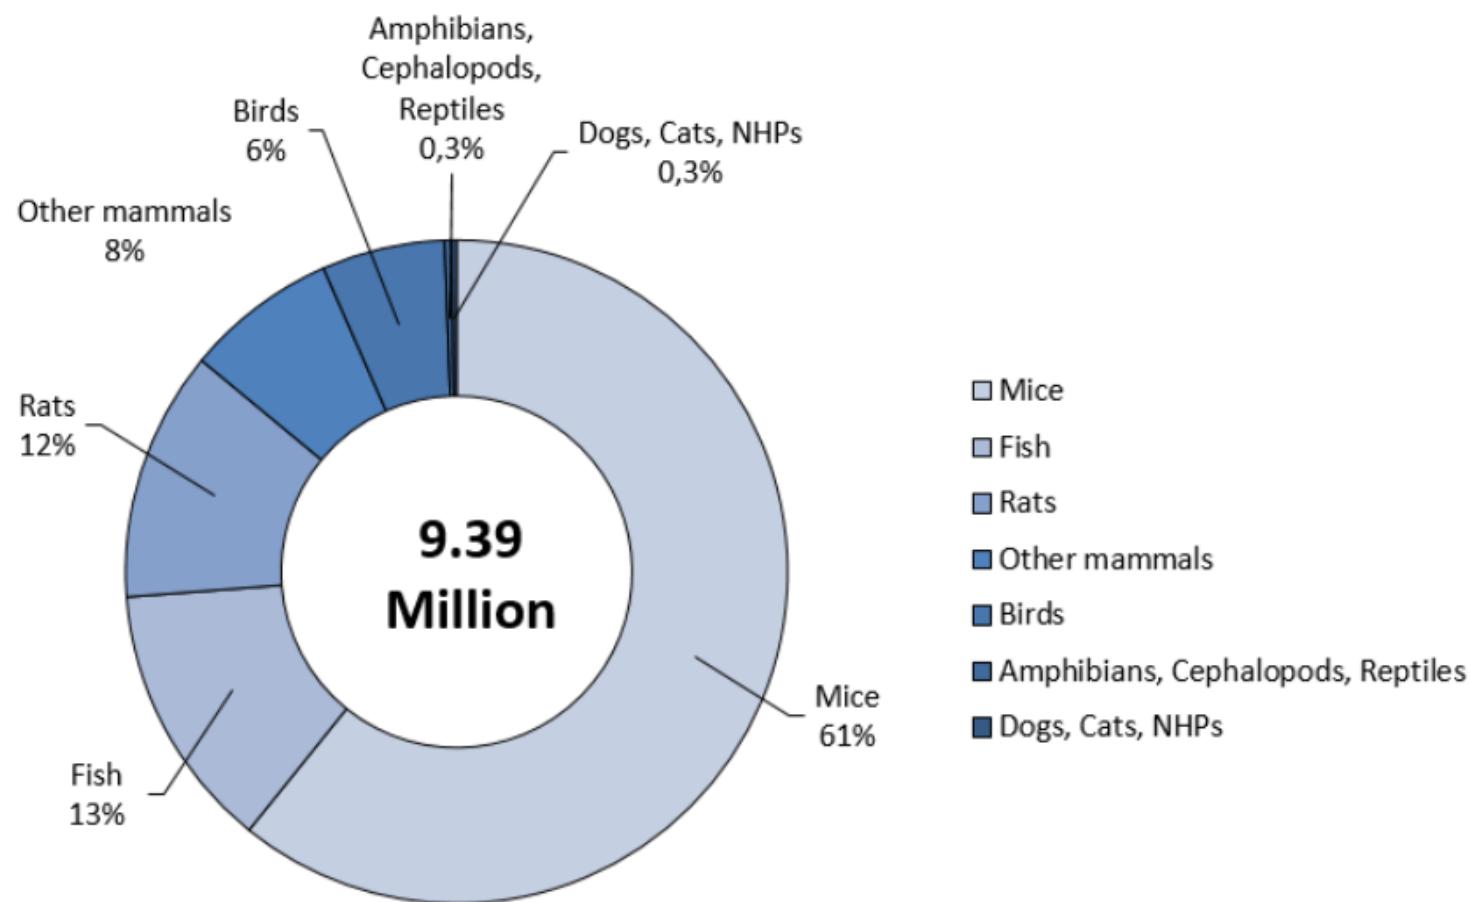

# Animal research

Europe 2017: 9.4 Million animals used for experiments

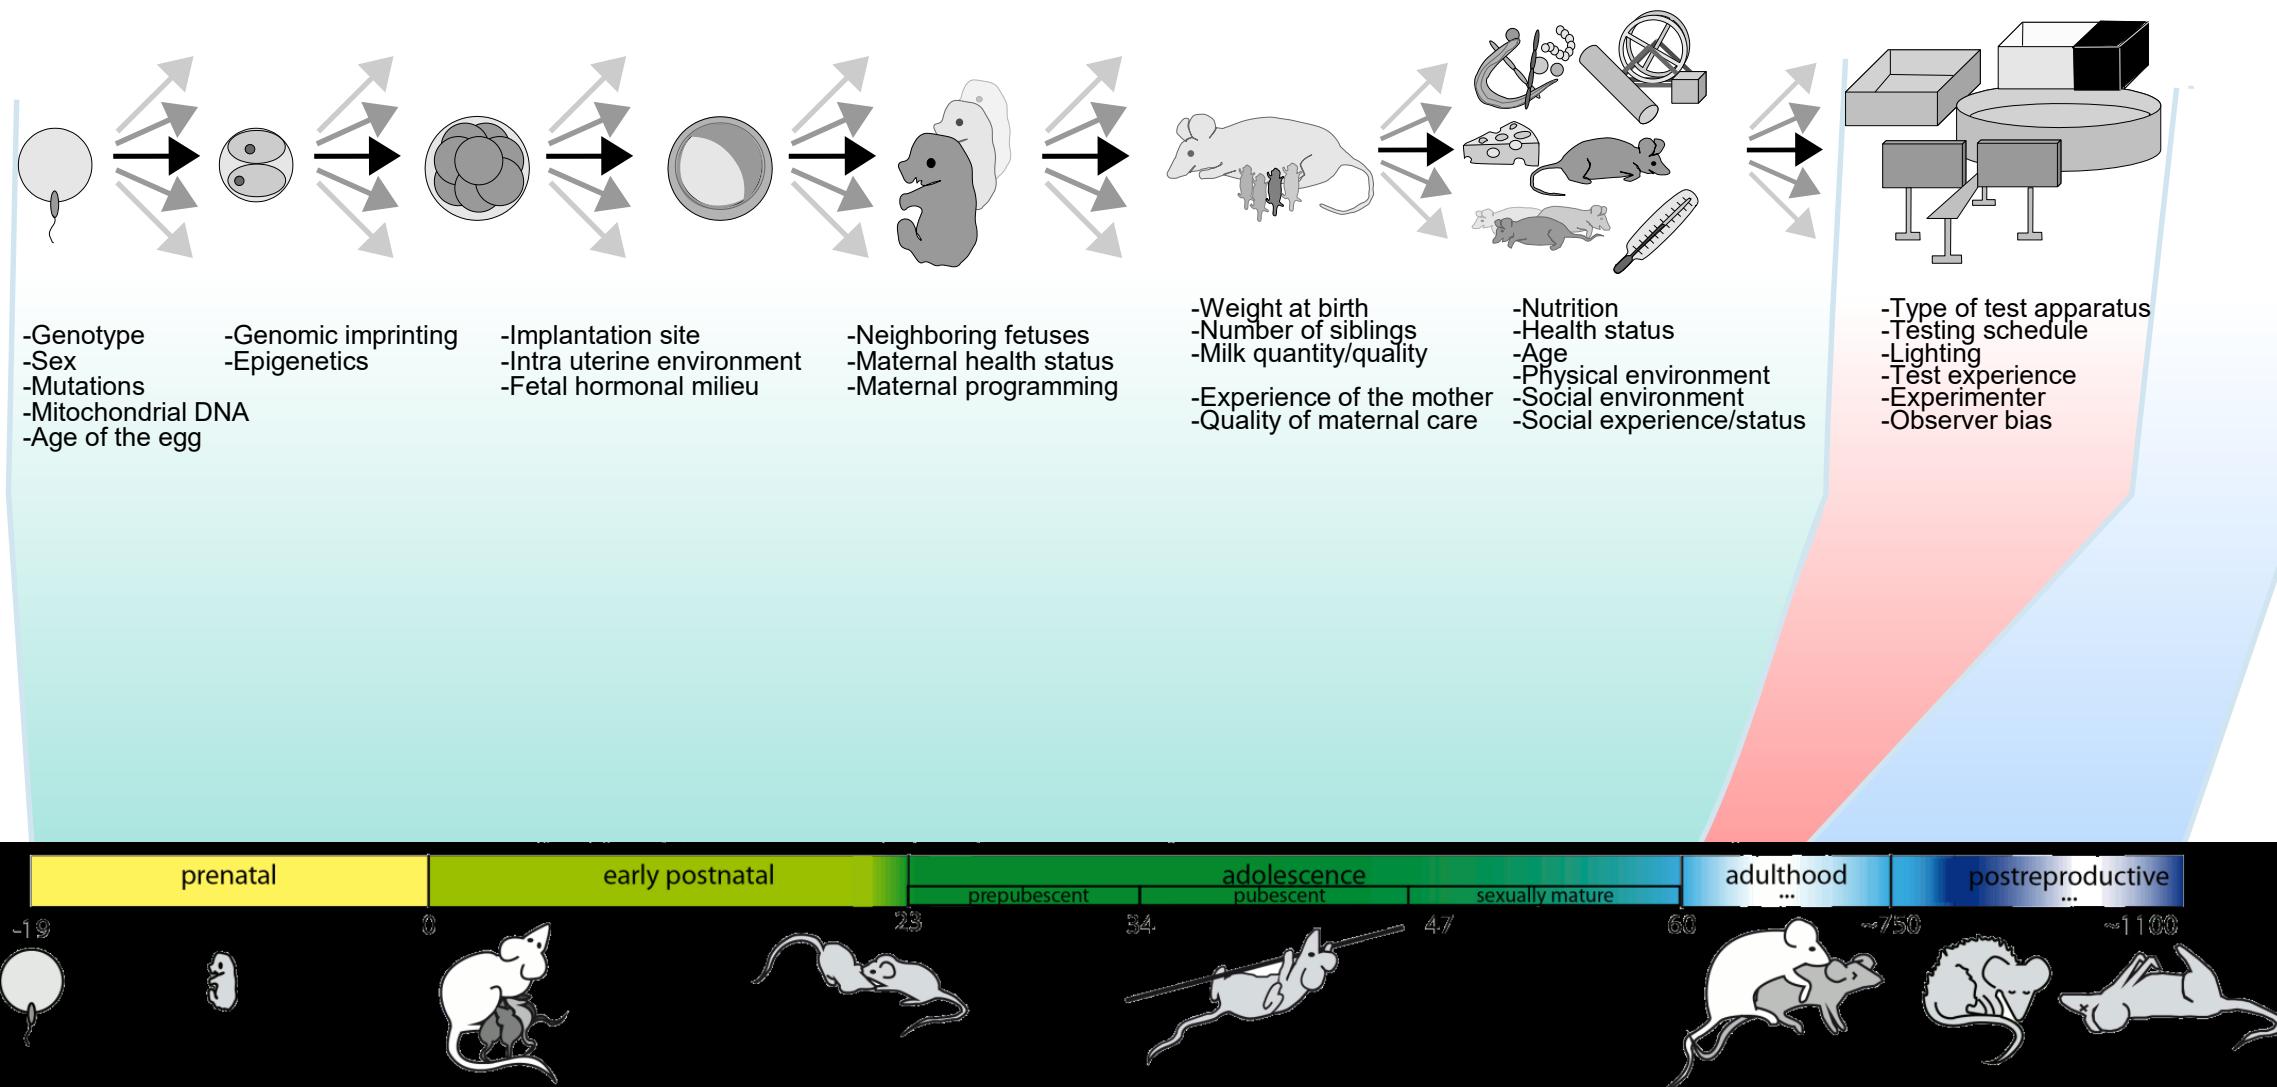

**14 Million additional animals**

(for tissue and organ samples, breeding and maintenance + surplus)

**Figure 1: Numbers of animals used for the first time by main classes of species in 2017**

# The Life of Laboratory Mice

Leweijohann, Zipser & Sachser (2011) *Dev Psychobiol*  
Brust, Schindler & Lewejohann (2015) *Frontiers in Zoology*

# Boredom

Gaston La Touche, L'ennui (1893)

Boredom is an emotional state experienced when an individual is left without anything in particular to do, is not interested in their surroundings, or feels that a day or period is dull or tedious.

# Boredom

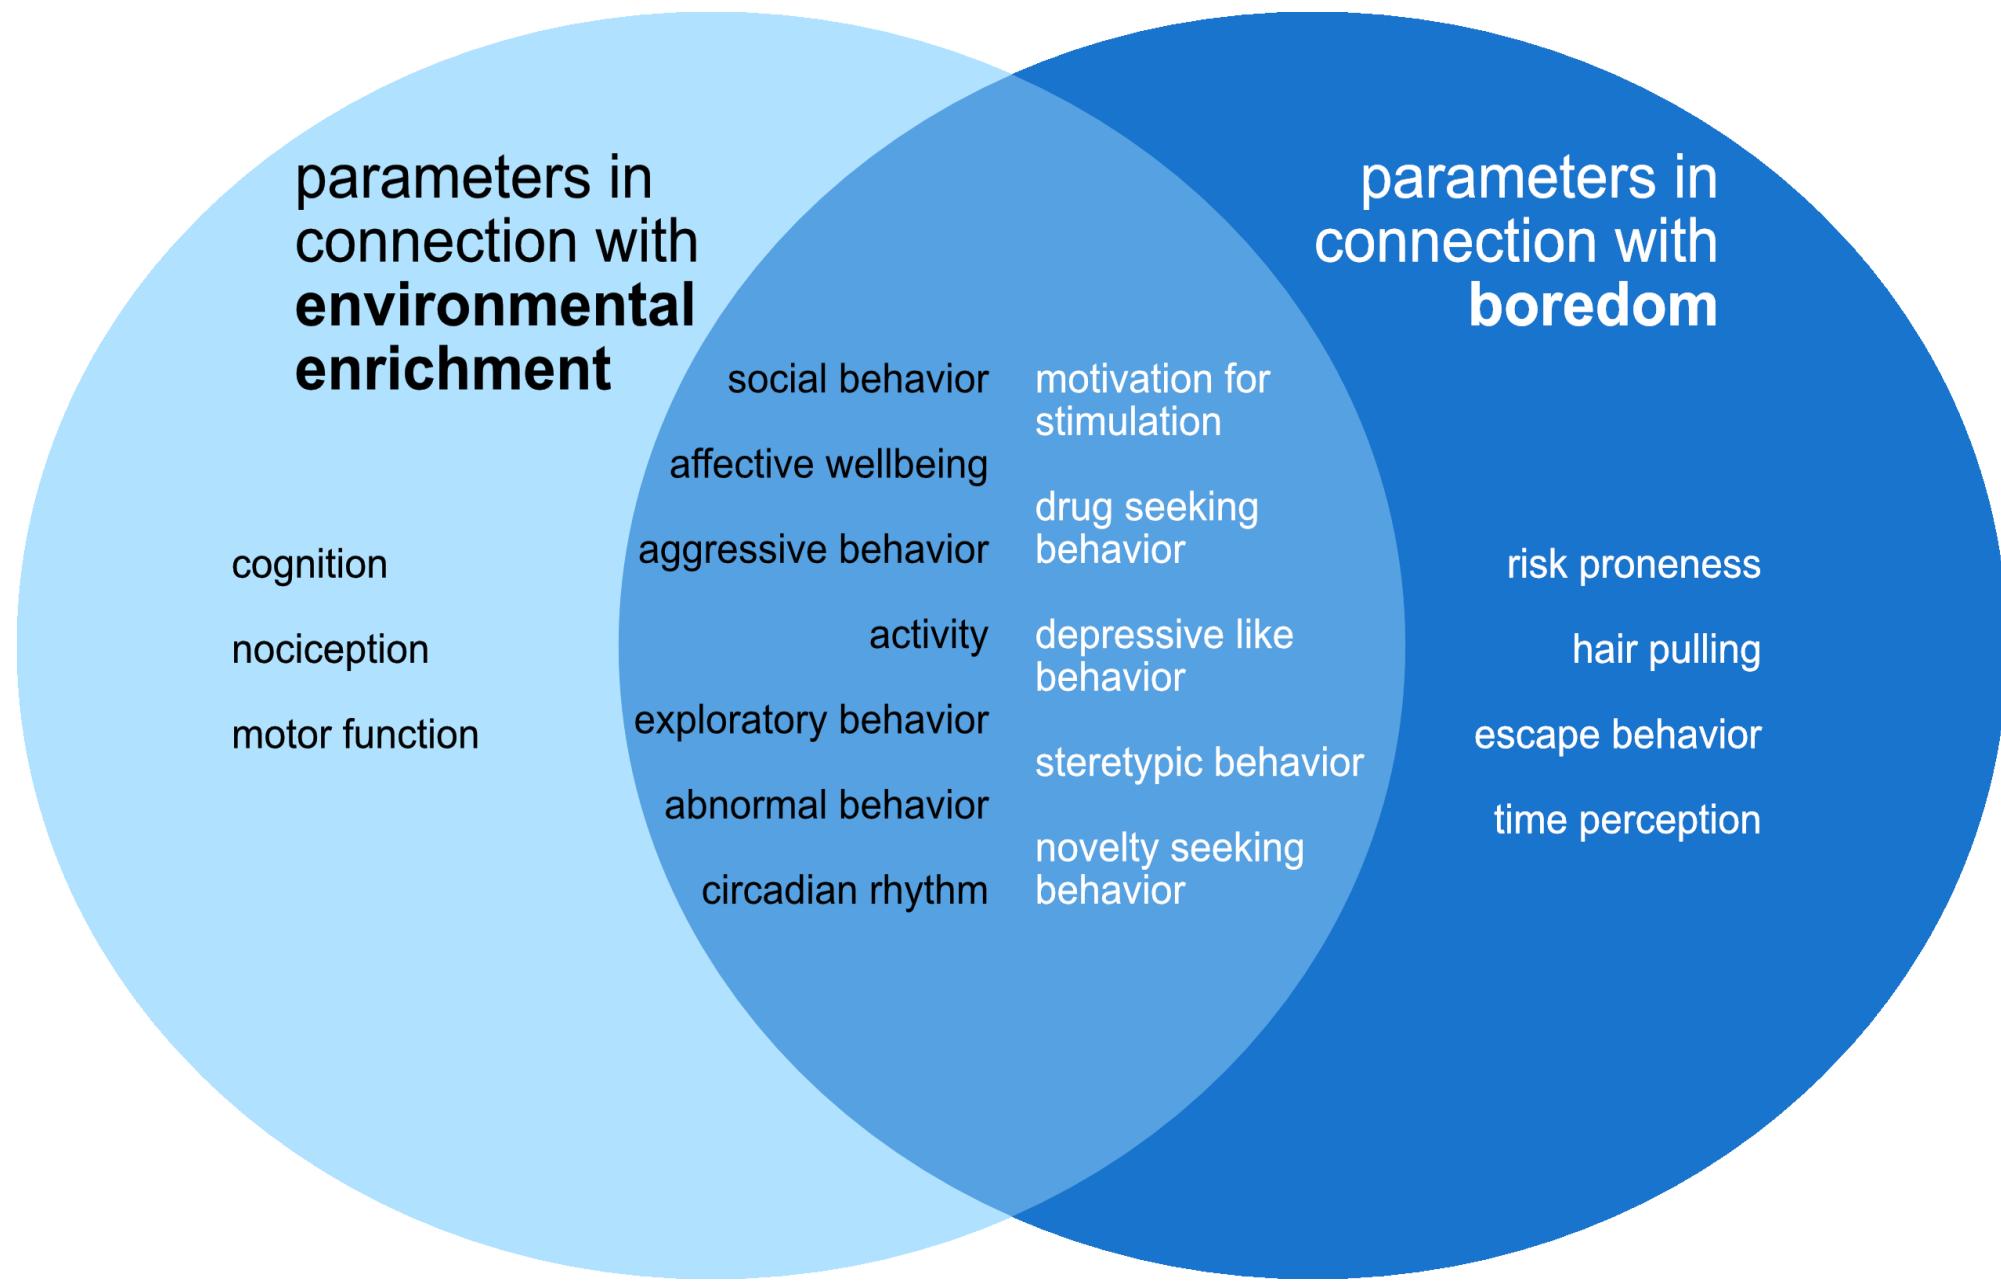

Sin City, *Image courtesy Dimension Films*

Boredom is similar to mental fatigue and is caused by repetition and lack of interest in the details of our tasks (such as tasks that require continuous attention, waiting at the airport, prisoners locked in cells). Any experience that is predictable and repetitive becomes boring.

# Symptoms of Boredom

## Stereotypic behavior

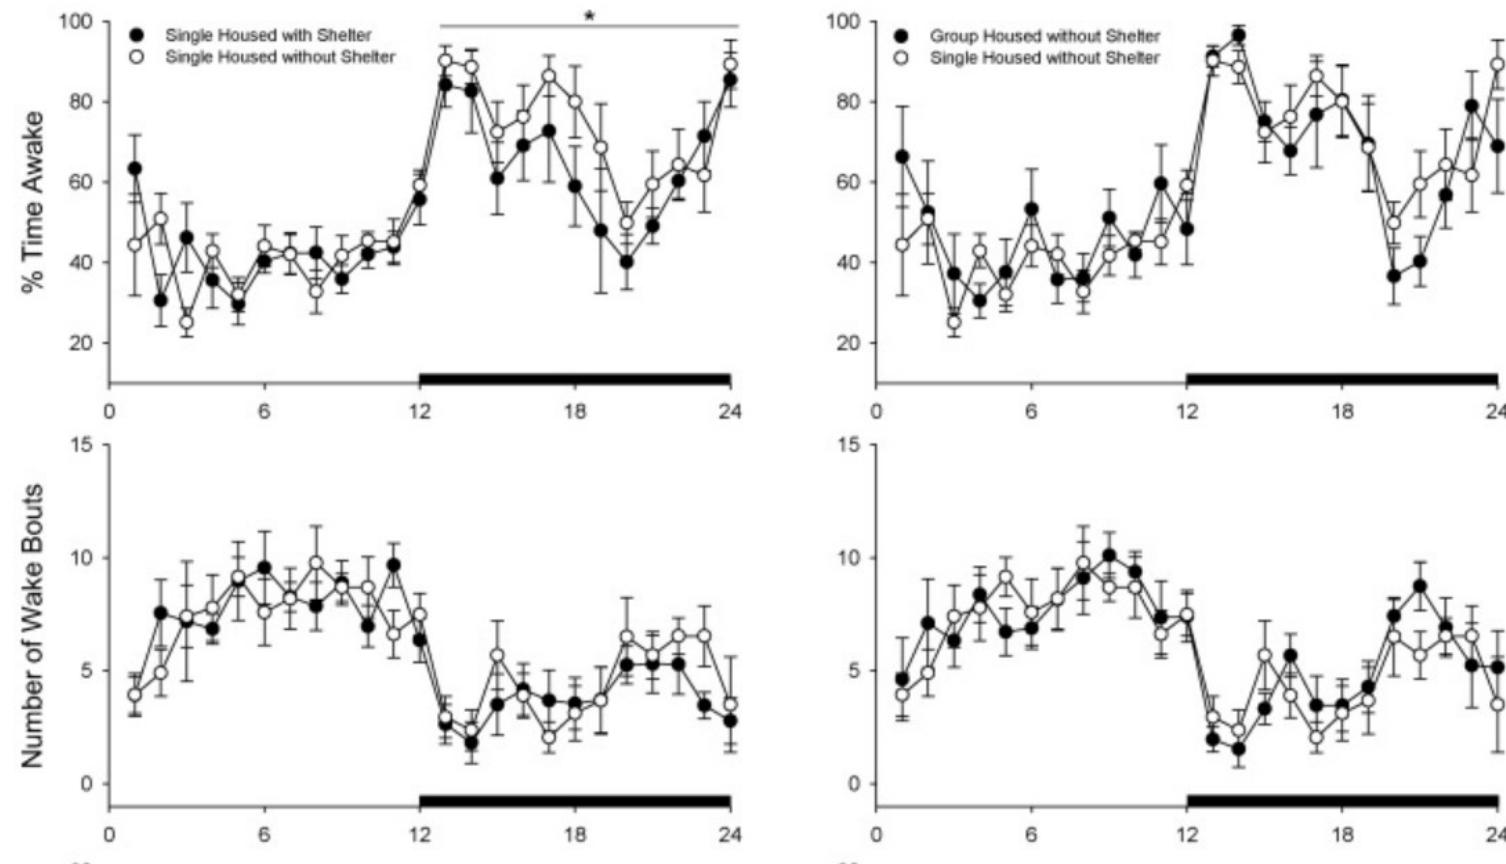

# Symptoms of Boredom

## Trichotillomania - Barbering

# Symptoms of Boredom

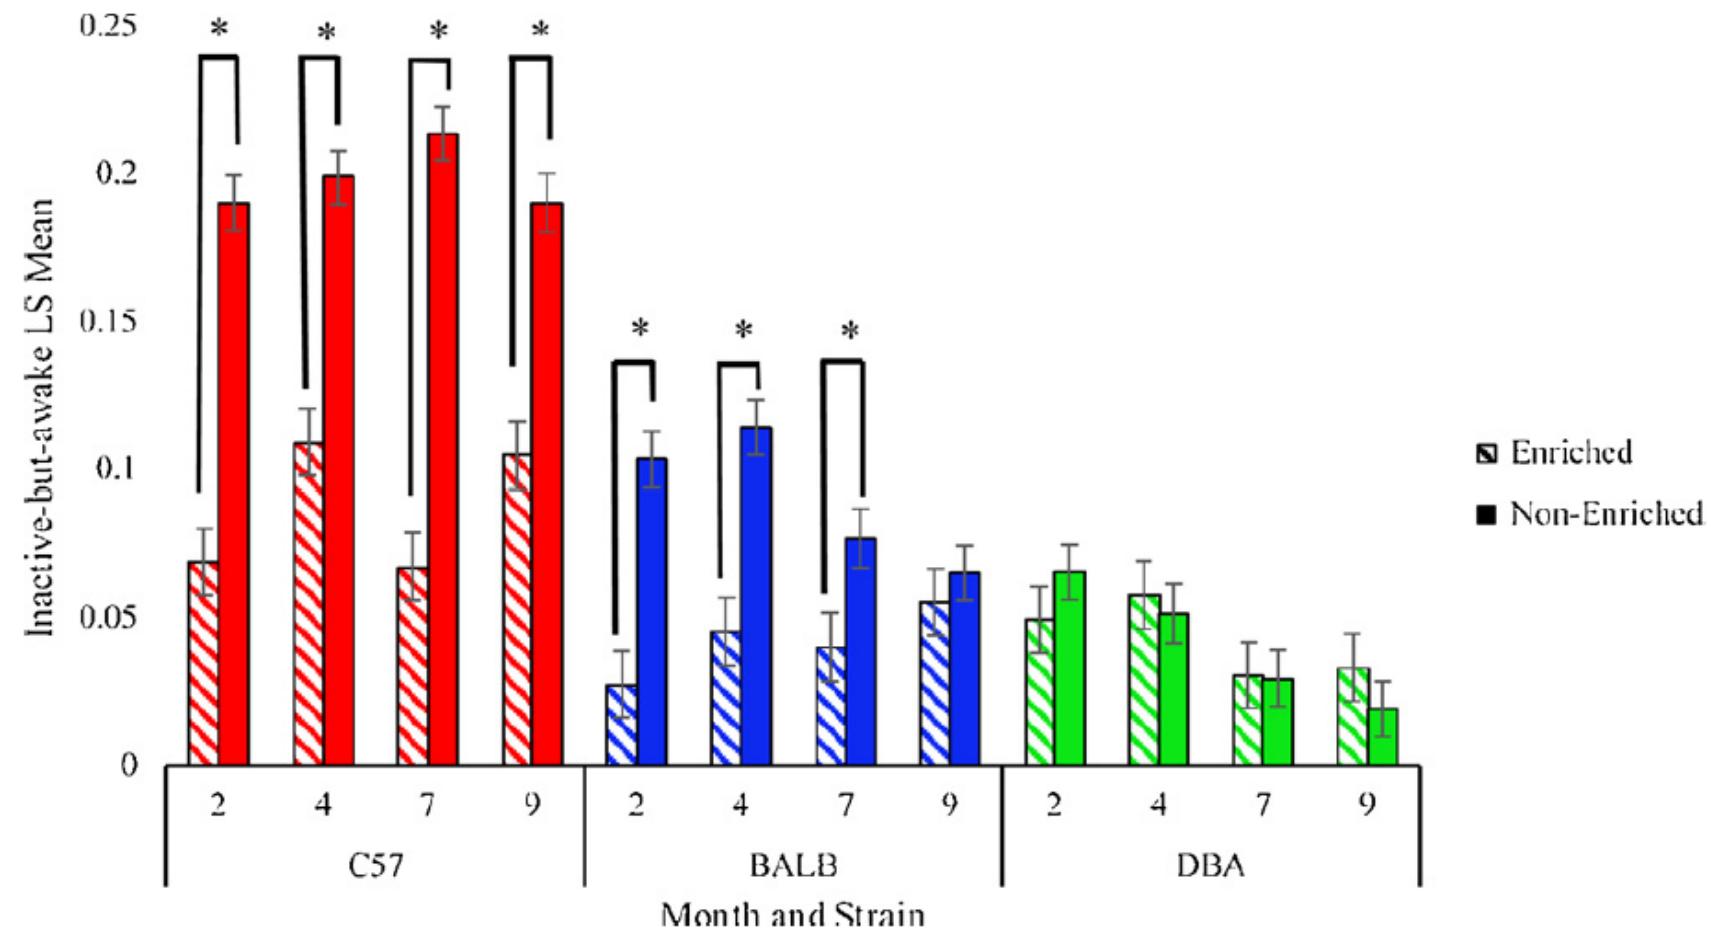

Increased rates of sleeping

**Febinger et al (2014) Effects of Housing Condition and Cage Change on Characteristics of Sleep in Mice**

# Symptoms of Boredom

Inactive but awake

Nip et al (2019) Why are enriched mice nice? Investigating how environmental enrichment reduces agonism in female C57BL/6, DBA/2, and BALB/c mice

# Symptoms of Boredom

Overeating?

[www.sciencemag.org](http://www.sciencemag.org)

# Measuring Boredom

## Time perception

E.g., by observing restlessness while waiting for a reward

# Measuring Boredom

Sensation seeking

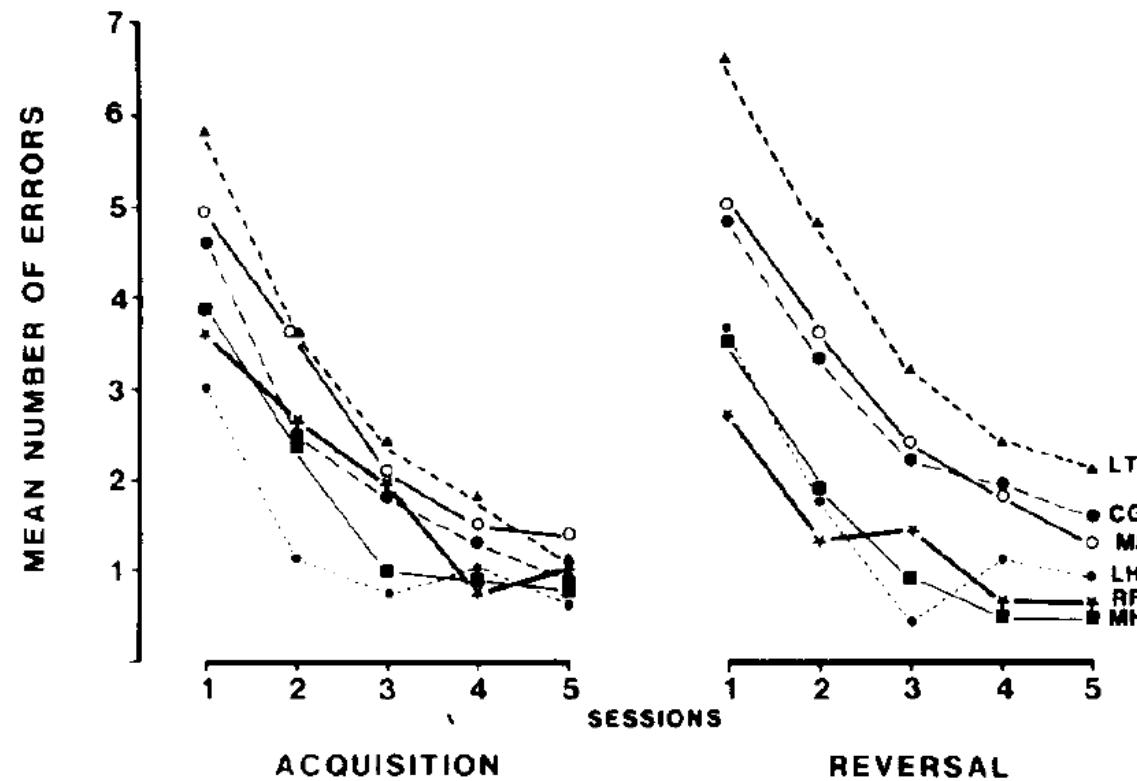

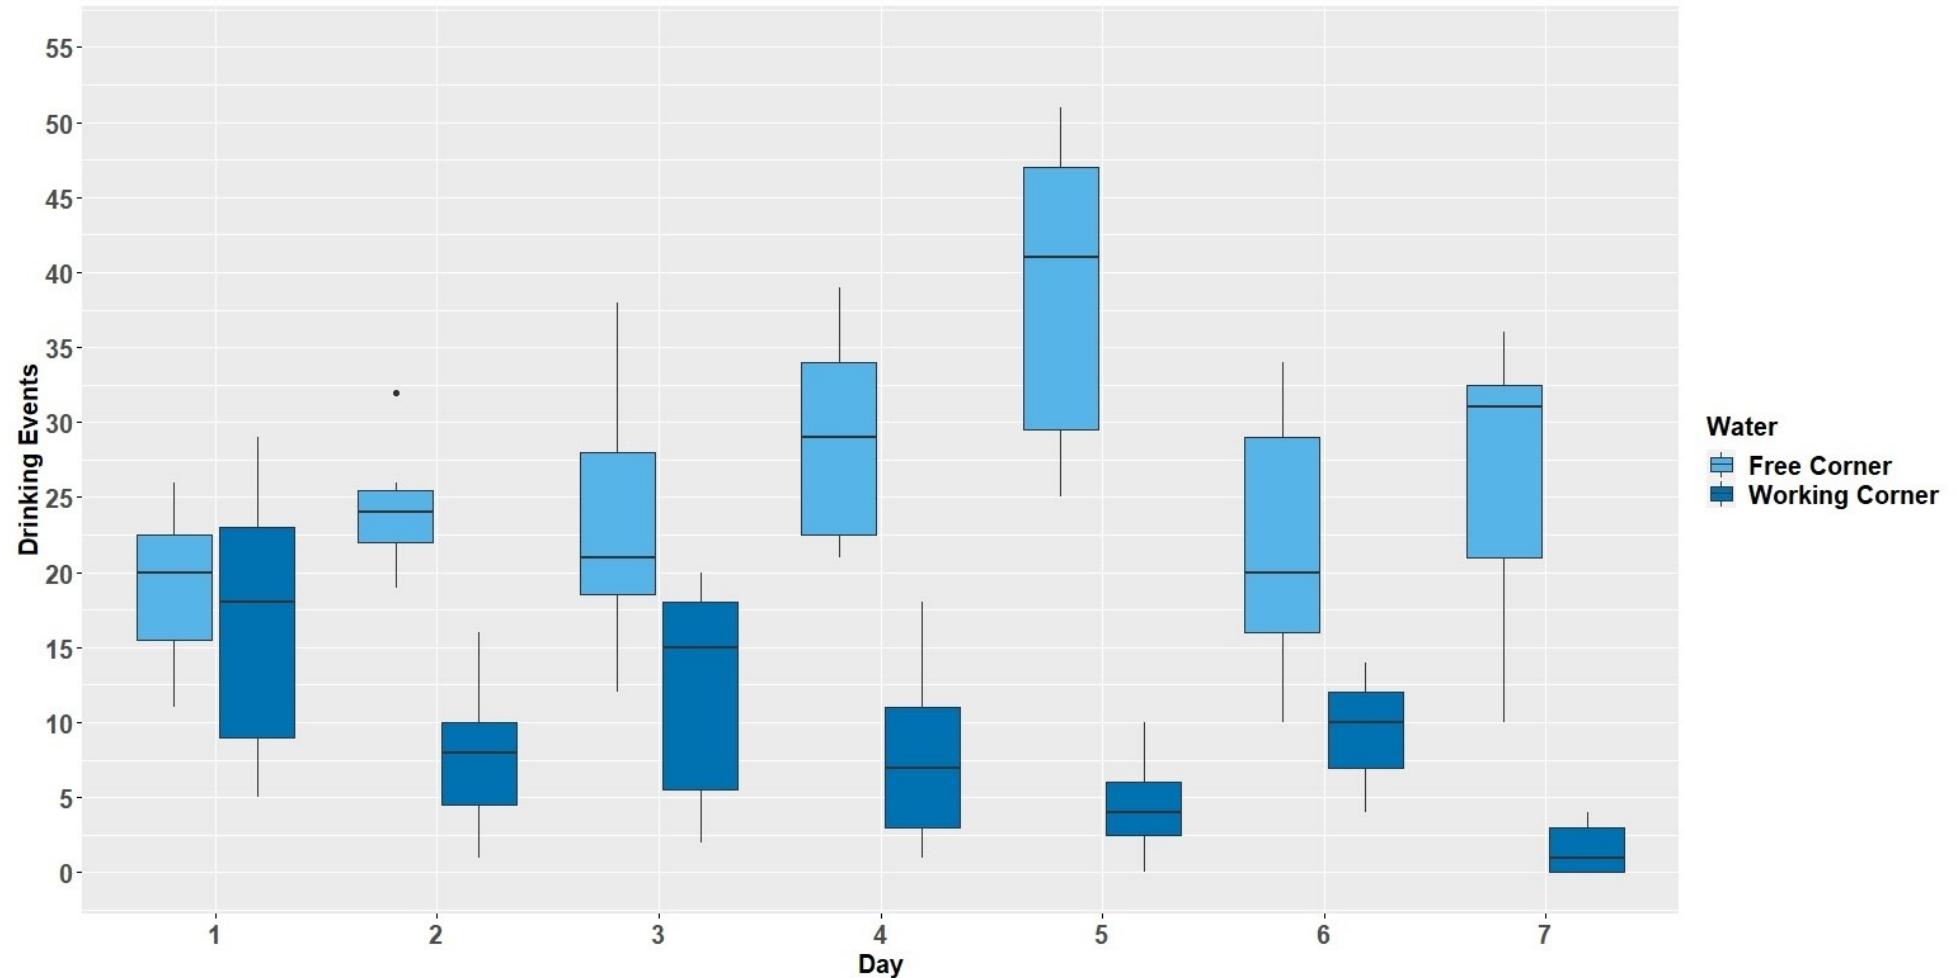

Fig. 2. Mean number of discrimination errors made by animals stimulated in CG (●), LH (●), LT (▲), MH (■), ML (○) and RF (★) during acquisition and reversal phases of the spatial discrimination task.

Cazala (1986) Self-stimulation behaviour can be elicited from various 'aversive' brain structures.

# Measuring Boredom

## Contra free loading

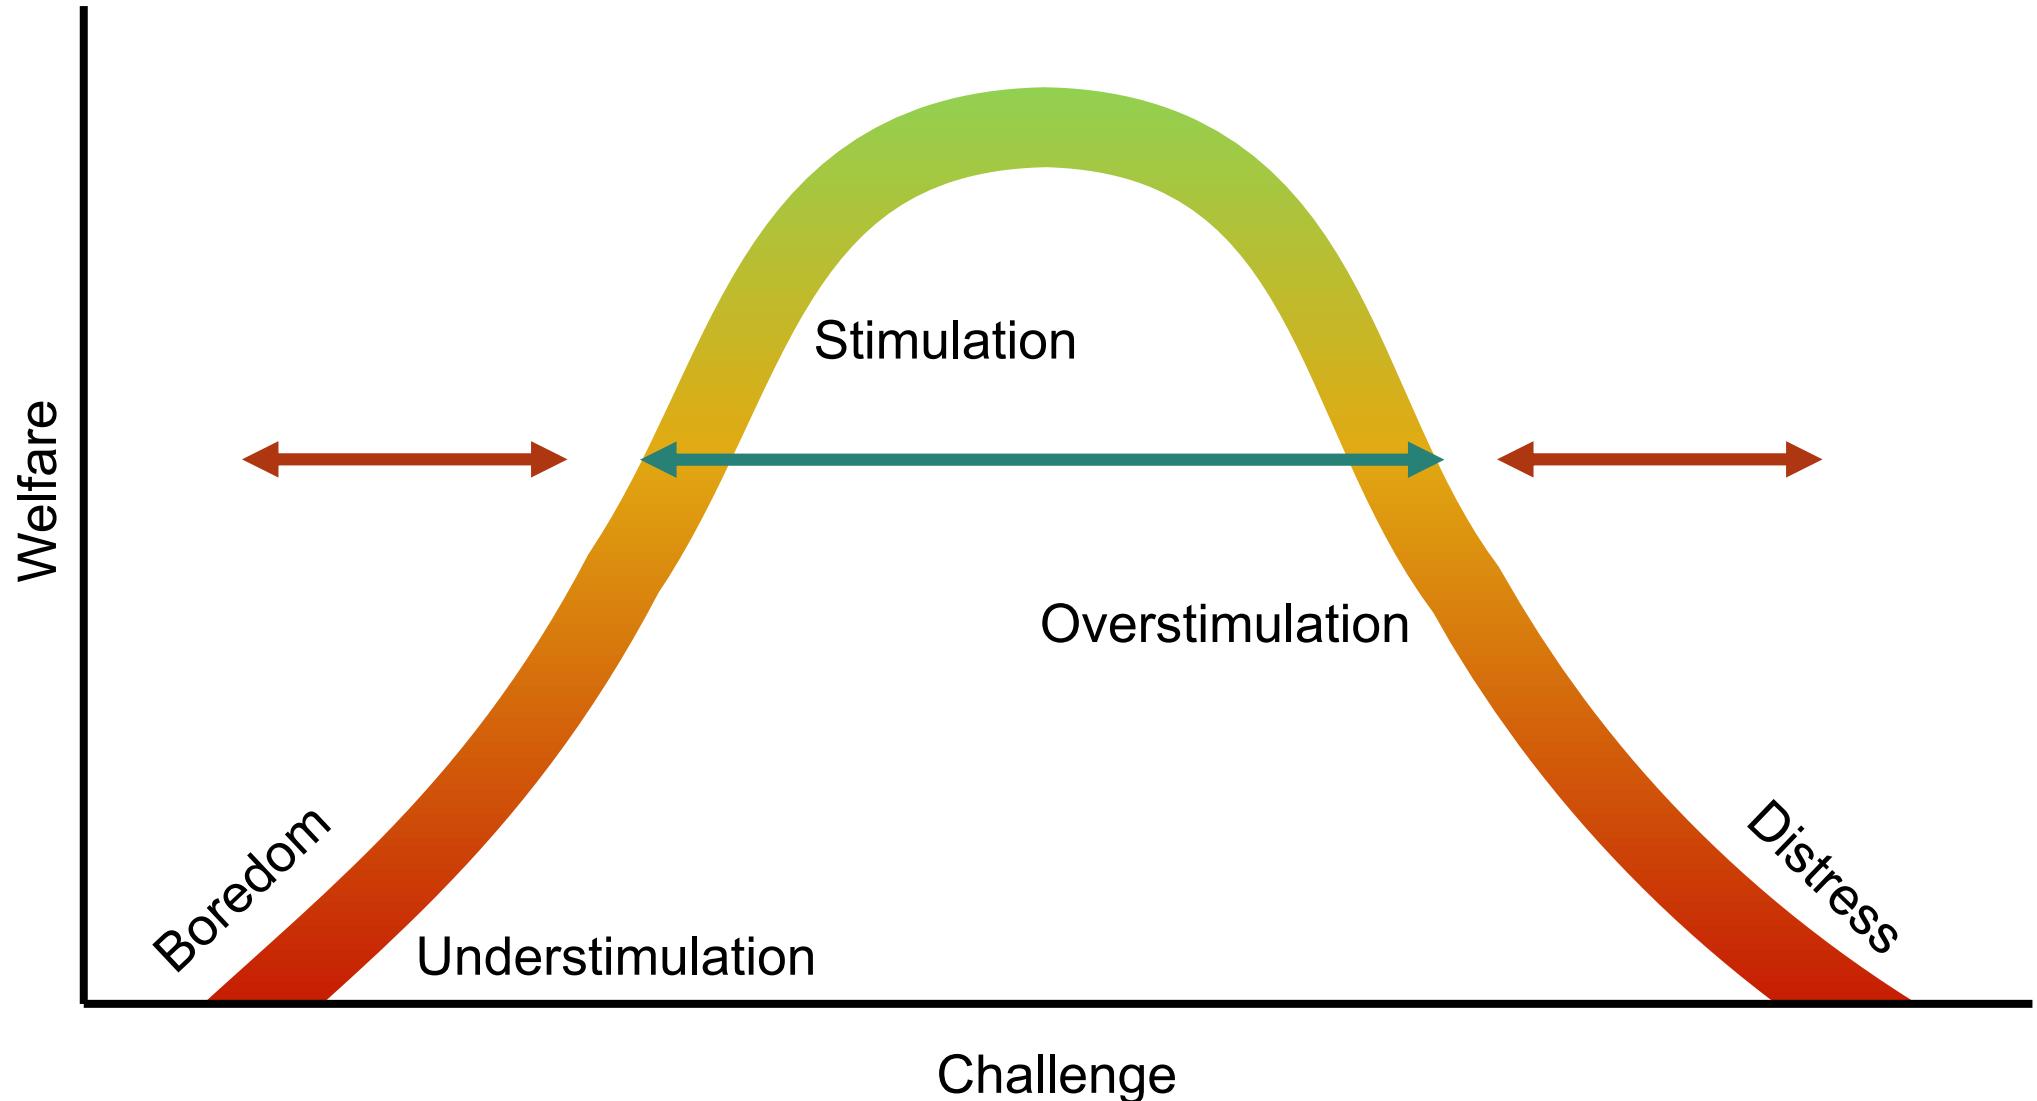

Contrafreeloading is an observed behavior in which an organism, when offered a choice between provided goods or goods that requires effort to obtain, prefers the good that requires effort.

Kahnau et al (in prep)

# Treating Boredom

Stress - The inverted U-shape
